# powerdot example 2

Hendri Adriaens          Christopher Ellison

March 15, 2007

Example 2                                                    for powerdot – slide 1

# Slide 1

- This is a bigger example

Example 2

for powerdot – slide 2

- This is a bigger example

- demonstrating more of the possibilities of powerdot.

Example 2

for powerdot – slide 2

# This section has a slide

Example 2

for powerdot – slide 3

Here is the binomium formula.

Example 2

for powerdot – slide 4

Here is the binomium formula.

$$(a+b)^n = \sum_{k=0}^{n} \binom{n}{k} a^{n-k} b^k \qquad (1)$$

Example 2

for powerdot – slide 4

Here is the binomium formula.

$$(a+b)^n = \sum_{k=0}^{n} \binom{n}{k} a^{n-k} b^k \tag{1}$$

We will prove formula (1) on the blackboard.
Click the title of this slide to switch to the black slide.

Example 2

for powerdot − slide 4

# Slide 3

■ **This happens...**

■ when you change...

■ the type of itemize.

Example 2

for powerdot – slide 5

# Slide 3

- This happens…

- when you change…

- the type of itemize.

Example 2

for powerdot – slide 5

- This happens...

- when you change...

- the type of itemize.

Example 2

for powerdot – slide 5

# A hidden wide section

Example 2                                              for powerdot – slide 6

- We only treat this material...

Example 2

for powerdot – slide 7

- We only treat this material...

    ◆ if we have some time left.

Example 2

for powerdot – slide 7

- We only treat this material. . .

  - ◆ if we have some time left.

  - ◆ But don't hesitate. . .

Example 2

for powerdot – slide 7

- We only treat this material...
  - ◆ if we have some time left.
  - ◆ But don't hesitate...
- to read it yourself.

Example 2

for powerdot – slide 7

# Slide 5

This wide slide can contain more material as it is wider and does not have a table of contents.

Example 2

for powerdot – slide 8
